S4A Maestro
Materials Management

**Mobilize your
SAP materials
management with
S4A Maestro.**

**The S4A Maestro suite of apps was designed to
make every aspect of SAP Logistics easier for
everyone in your organization.**

Each App connects directly to your data from SAP to streamline and improve each process and adds offline capability. Take your SAP transactions anywhere with extraordinary mobile capabilities

Built for SAP® ECC and S/4 HANA®.

Simple Apps. **Powerful** Functionality.

Built for Speed. Designed for the Field.

S4A Maestro brings together a powerful suite of mobile SAP applications into one seamless platform, giving your workforce instant access to the tools they need—whether they're on the shop floor, in the warehouse, or in the field.

Streamline Material Management

Search, issue, transfer, receive, count, and track materials with fast, intuitive workflows that reduce manual effort and improve inventory accuracy.

Empower Mobile Warehouse Operations

Replace paper-based processes with barcode scanning, real-time inventory updates, label printing, and mobile transactions that keep your warehouse moving.

Access Critical SAP Data Instantly

Find the information you need in seconds. View material details, stock availability, purchase orders, locations, documents, and more—directly from your mobile device.

Increase Inventory Accuracy

Perform cycle counts, validate inventory, manage storage bins, and maintain accurate stock levels with live SAP integration.

A collection of apps designed to help organizations get the most out of their SAP® investment

Simplify Procurement & Receiving

Accelerate goods receipts, manage purchase orders, monitor subcontractor inventory, and keep procurement teams informed with real-time visibility.

Make Better Decisions Faster

Access live inventory availability, material requirements, and operational insights that help prevent shortages, reduce delays, and improve planning.

Built for Enterprise Mobility

Designed specifically for SAP environments, Maestro delivers secure, reliable mobile experiences that increase productivity while reducing training and operational costs.

One Platform. Endless Possibilities.

With a growing library of business applications, S4A Maestro adapts to your organization's workflows—allowing you to deploy the functionality your teams need today while expanding as your business evolves.
