S4A Tempus
Time Tracking

Manage and submit your timesheets anywhere, any time

S4A Tempus Time Tracking simplifies
and mobilizes time entry into SAP for
your entire organization.

All the features you need for effortless time tracking

Providing your team with the flexibility to add time entries on both desktops and mobile devices – all with just a few clicks from anywhere in the field.

Works offline with seamless sync to SAP®

Add time entries from anywhere, anytime, even with no internet connection. Tempus saves all time entries, and will sync everything when you're back online.

Better planning, with metrics that matter

Plan smarter by always knowing target, actual, available, and overtime hours for any day. Get clear historical time entry data with our beautiful reports.

Personalization settings

Update default app settings based on how and when you work, so you can save time and clicks when managing your time.

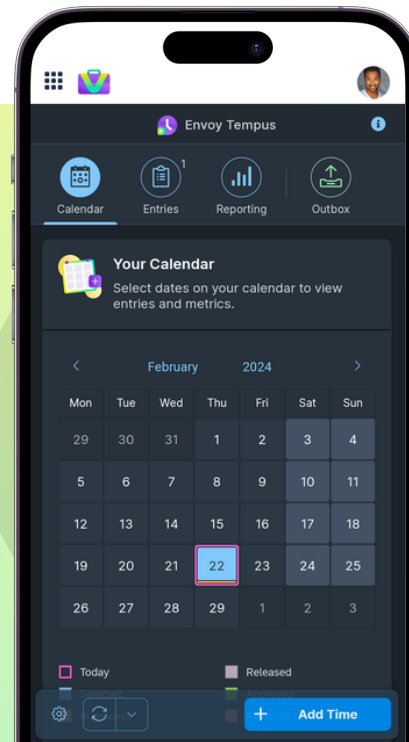

Extend and customize

Need customization? We are comprised of some of the best IT consultants, developers, and designers who can help.

An intuitive, lightweight solution

Empower your team to meet work targets and enter time on the go.

There's even more to love

S4A Tempus also works with BlueWorx, and is backed by our amazing support and consulting staff.

Accenture Blueworx Ready

S4A Tempus integrates directly with Blueworx allowing you to continue to take advantage of its data, features, parameters and configuration.

Always here to help

Our team is comprised of not only the best and most experienced SAP consultants, but industry leading developers, designers and functional experts.

Seamless SAP® Syncing

Leveraging the Neptune platform (Certified SAP® Add-On) directly access your SAP data and transform clunky logistics functions into quick, easy, and intuitive processes for your staff.
