

S4A Maestro Materials Management

Mobilize your SAP Logistics with S4A Maestro.

The S4A Maestro suite of apps was designed to make every aspect of SAP Logistics easier for everyone in your organization.

Each App connects directly to your data from SAP to streamline and improve each process and adds offline capability. Take your SAP transactions anywhere with extraordinary mobile capabilities

Built for SAP® ECC
and S/4 HANA®.

Seamless syncing to
your SAP® data.

Simple, fast, and works anywhere.

– Offline Capability

Enjoy uninterrupted operations by seamlessly transitioning between online and offline modes. Whether you're in a remote location or facing connectivity issues, S4A Maestro™ ensures that your logistics processes continue without a hitch.

– Fully Responsive

Every app within the suite is meticulously designed and rigorously tested to perform flawlessly on all devices. Regardless of your business's preferred platform, you can rely on S4A Maestro to deliver consistent and optimal performance.

– Extendable and Customizable

S4A Maestro™ can be tailored to suit your evolving business needs effortlessly, ensuring that it aligns perfectly with your unique logistics workflows.

– Top-Notch Support

Count on S4A Maestro for prompt and effective support, ensuring that any questions or technical issues are addressed promptly, allowing your team to focus on what they do best.

– Built by Industry Experts

S4A Maestro™ is the brainchild of S4A IT Solutions, an industry leader boasting over 50 years of combined experience in SAP project lifecycles and enterprise functions. Benefit from the wealth of knowledge and expertise embedded in every aspect of our solution.

– Trusted by the Best

S4A Maestro™ is the preferred choice for those seeking robust and reliable applications to streamline their logistics operations, including some of the largest companies in North America.

Simple apps. Powerful functionality.

Built for Speed. Designed for the Field.

S4A Maestro brings together a powerful suite of mobile SAP applications into one seamless platform, giving your workforce instant access to the tools they need—whether they're on the shop floor, in the warehouse, or in the field.

Streamline Material Management

Search, issue, transfer, receive, count, and track materials with fast, intuitive workflows that reduce manual effort and improve inventory accuracy.

Empower Mobile Warehouse Operations

Replace paper-based processes with barcode scanning, real-time inventory updates, label printing, and mobile transactions that keep your warehouse moving.

Access Critical SAP Data Instantly

Find the information you need in seconds. View material details, stock availability, purchase orders, locations, documents, and more—directly from your mobile device.

Increase Inventory Accuracy

Perform cycle counts, validate inventory, manage storage bins, and maintain accurate stock levels with live SAP integration.

Simplify Procurement & Receiving

Accelerate goods receipts, manage purchase orders, monitor subcontractor inventory, and keep procurement teams informed with real-time visibility.

Make Better Decisions Faster

Access live inventory availability, material requirements, and operational insights that help prevent shortages, reduce delays, and improve planning.

Built for Enterprise Mobility

Designed specifically for SAP environments, Maestro delivers secure, reliable mobile experiences that increase productivity while reducing training and operational costs.

What problems does Maestro solve?

Excessive Spreadsheets

Is your organization tracking things like work orders, assets, or resources with large spreadsheets separate from your SAP system? Our solutions solve this through:

- Eliminating spreadsheets and manual data entry
- Seamless SAP Integration
- Offline support
- Mobilizing your workforce

Needless Manual Processes

Is your team struggling with long manual processes like data entry, delivery, reporting, or issuing? We've helped many organizations with:

- Automating tasks and workflows
- Reducing delivery times & workloads
- Increasing data accuracy
- Solving worker frustrations

Complex Legacy Software

Stuck on outdated legacy software that may have performance, compatibility, and mobility issues? We're here to help with:

- Increased control and cost efficiency
- Enhance security and device compatibility
- Proactive monitoring and troubleshooting
- Simplify complex tasks

Frustrated Users

Receiving negative feedback on application user experience or the hassle of field data entry? Let us help with:

- Top-tier UI/UX design
- Seamless SAP data updates directly from the field
- More immediate and up-to-date reporting
- Improved user adoption and satisfaction

No Offline Support

If your organization isn't able to manage assets and inventory due to system or network availability – we can solve this with:

- Offline capable apps
- Automatic sync to SAP upon reconnection
- Increased wrench time
- Improved communication

Lack of Reporting & Insights

Accurate and up-to-date reporting is essential for compliance, decision making, and risk management. We can help with:

- Live reporting access at your fingertips
- Actionable insights through intuitive dashboards
- Integrations with tools like PowerBI
- Seamless SAP integration

System Requirements:

S4A Maestro requires an **SAP ERP System** (ECC v6+ or S/4 HANA), Neptune Software's **SAP Certified Add-on**, and lastly the installation of any other S4A applications of your choice.

Compatible with

ECC: PM/IM/WM/WM, HR (Human Resources)

S/4 HANA: MM/IM/WM, Asset Management, HR (Human Resources)

COMPATIBILITY:

All S4A applications are compatible with all modern browsers and optimized for all mobile devices¹ including Apple's iOS and Android. All software also meets accessibility standards.

**Online connection required.

TECHNICAL SPECS:

The underlying technology used by S4A Software is **SAP ABAP** for the backend logic, **JavaScript** for the frontend logic and **SAPUI5** (Fiori) for the look and feel.

All from a single code base controlled from within your SAP ERP system and managed using the familiar SAP Transports you trust.

CONFIGURATION:

All S4A software will include an administration application allowing you to control which apps are active, licenses, and any parameters available within each app enabled.

All S4A software also supports **multi-language** functionality, including the Neptune cockpit.

DOCUMENTATION:

All S4A products are backed with a full set of documentation for your users, management and functional teams.

- Functional & deployment guides
- User guides for each app
- Video walkthroughs for each app
- Access to support center
- Access to request new features
- Concierge onboarding
